

SUMMER BROCHURE

*The separate collection
does not go on vacation*

TIPS FOR THE RECYCLING OF WASTE

First rule: Find out about the collection methods in use in the municipality where you have chosen to spend your holidays.

Second rule: organic waste must be disposed of using biodegradable and compostable bags.

Third rule: beware of metal waste (cans, jars, tinfoil). For this material, each municipality makes its own.

If you go to the beach in the surrounding areas **WHAT TO DO**

1. Always carry a beach ashtray
2. Do not abandon the waste
3. Limit the use of single-use plastic
4. Do not forget the children's games on the beach, they pollute a lot and could be dispersed in the sea

TIPS UNDER THE UMBRELLA

Try to reduce waste by:

- Not always what is broken is irrecoverable. Before throwing it, try to fix it. And if you just can't do anything, inform to dispose of it properly;
- Choose fresh and loose products, avoiding foods packed with a thousand wrappers and disposable packaging;
- Use the bottle for your drinks;

TIPS UNDER THE UMBRELLA

- Do not buy a thousand plastic games that last the time of a holiday. Choose a few really useful items, which you can reuse elsewhere or in the years to come;
- Use your imagination to play at the sea: draw on sand with sticks, count shells (but do not take them with you, leave them where they are), create castles and sand sculptures, have fun in the pool.

HAPPY HOLIDAYS!

Enjoy the summer responsibly, to respect the environment is very little:

- Reduce the waste at the table and make a moderate purchase appropriate to your needs;
- Ask the person who rented your apartment or room, the municipality or the company that manages the waste collection service and expose them on the days set;
- Use the services provided (ecological islands, waste baskets, direct contact with operators).

SUMMER CREATIVE RECYCLING

- The chair is broken and can not be fixed? Recover the fabric and give free rein to fantasy. For example, you can create colorful and durable shopping shoppers;
- With the old mats you can create useful coasters;
- Buckets and palettes that your children no longer use can be reused for gardening or, if you have friends with children, you can give them to them. They'll be so happy!
